

# DRYDEN DESIGNS

Scroll Down  
▼

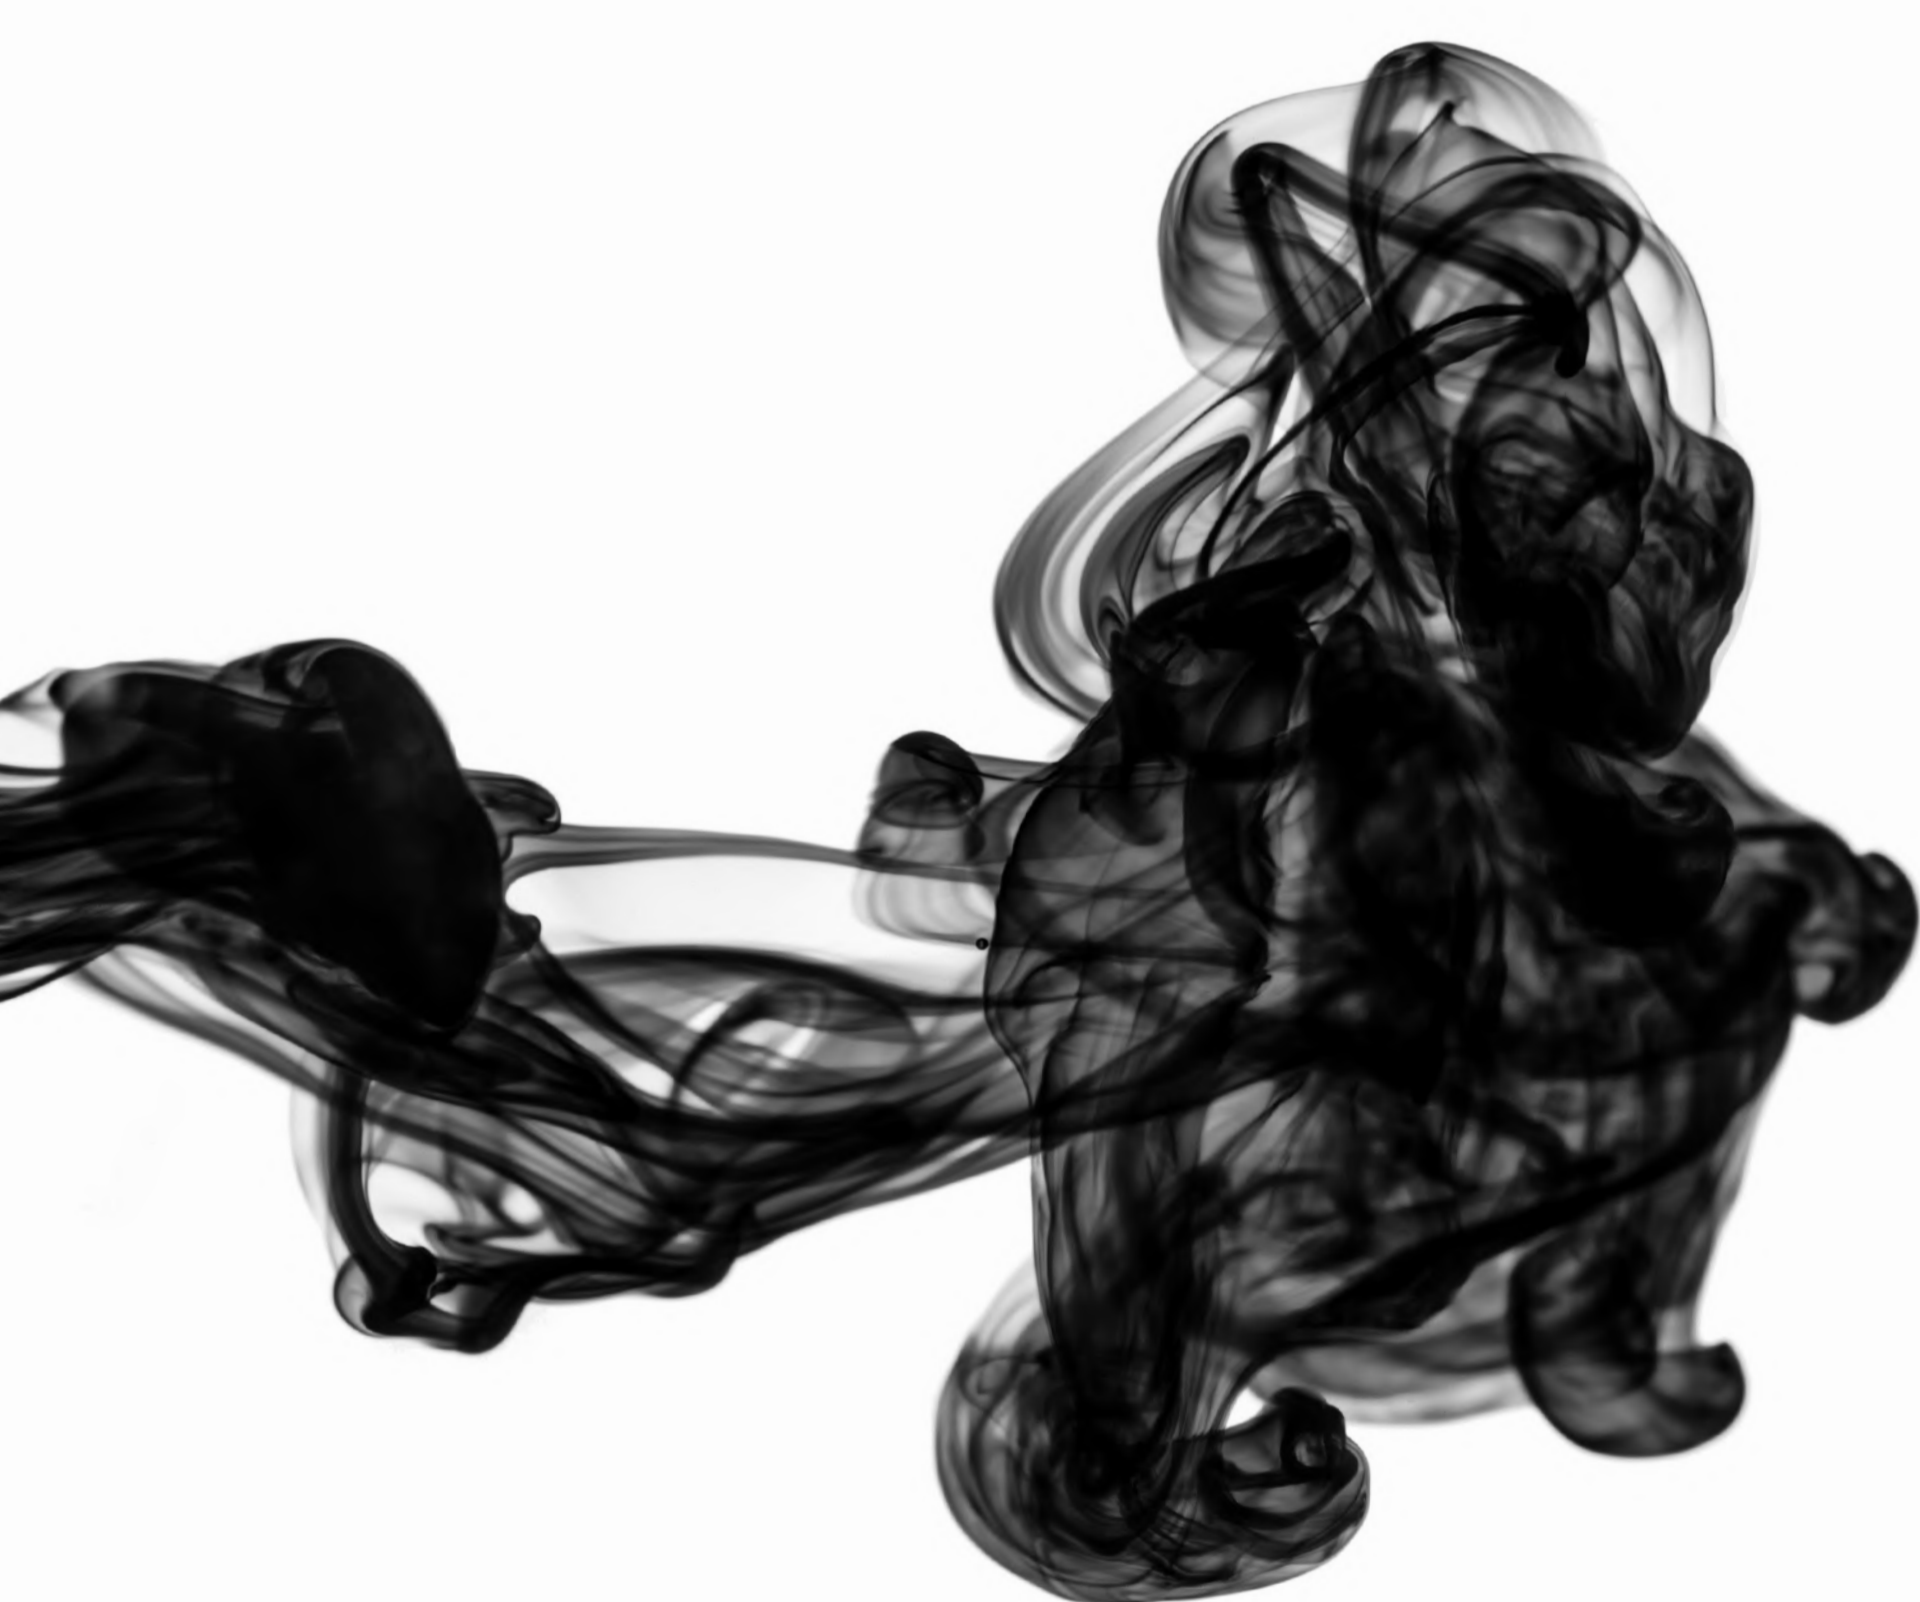

Many gloriously filled reams of paper and spent cartridges of ink later, Dryden Designs is now a highly respected and globally prominent luxury pen business. We continue to make our product range accessible to everyone by providing high quality pens at a fraction of the price you'll pay for other fountain pens.

It's about quality and precision

## Artfull simplicity

This will be your best writing tool that you carry around and bring with you everywhere. With the smooth lines, consistent flow, your lines will always glide across the page whether it is notes in your agenda or doodles on the side of a page. With zero ink leakage and cap cover, this is the perfect writer's pen.

## Express luxury

Making a Dryden pen nib is a precise and refined process. They are created from a single sheet of precious metal which is pressed, compressed to ensure strength and then cut to shape.
